
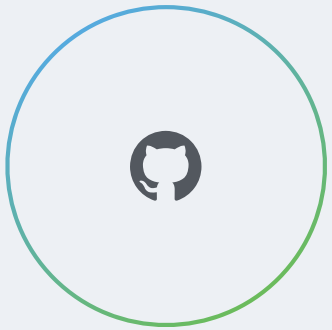
I code because I have to.

And sometimes I have fun doing it!

@hectorsector
Trainer

A little bit about me.



But let's not talk about me,
let's talk about you!

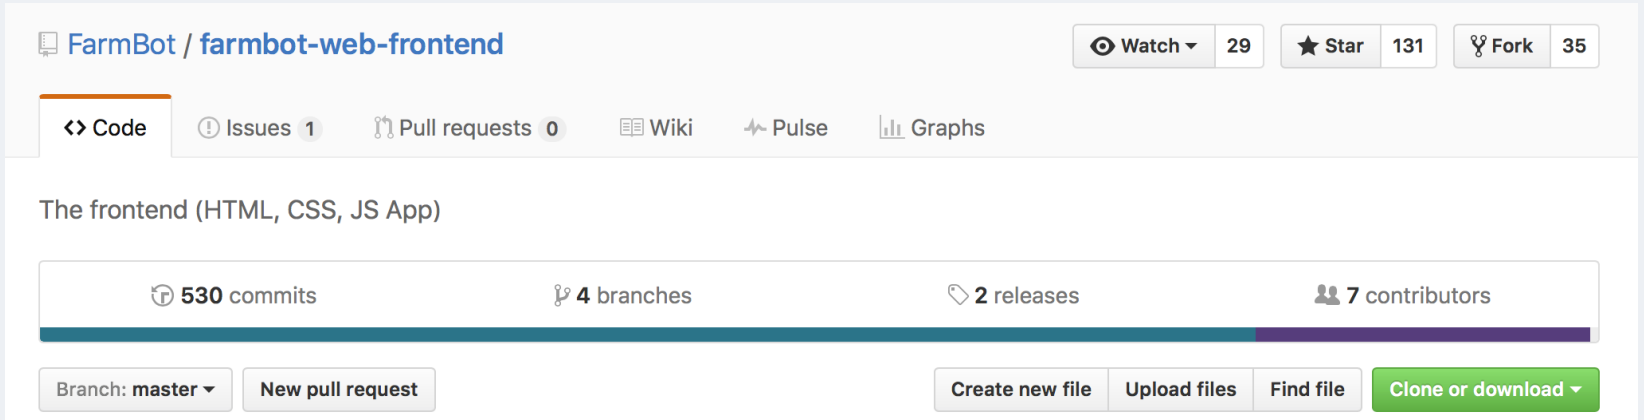
How people build software

FarmBot



Low Hanging Fruit

Are you a developer? Do you want to help? Don't know where to start?

Here are some easy-to-do tasks that our (small) team hasn't gotten around to yet:

- [ ] Writing unit tests for existing code.
- [ ] Factoring out implcity `any` types. This was originally a vanilla JS project that later became TypeScript. We have a lot of "unsafe" code that does not have type annotations yet.
- [ ] DRY up URL usage into a URL config object. A lot of AJAX requests are still relying on hardcoded strings rather than DRY configuration.
- [ ] Any comment in sourcode with the word `HACK` or `TODO`.
